

# XPANDAc<sup>ll</sup>

**XPANDAc cell provides carrier grade cellular repeaters and extenders** to improve limited or non existent cellular reception.

**XPANDAc cell repeaters are designed for use** with any business, organization, government agency or rural community. Some of our customers include:

- Corporate and Enterprise
- Federal, State and City Government
- Oil and Gas
- Mining
- Resort and Hotels
- RV Parks
- Military and Armed Services
- Medical
- Legal
- Insurance
- Automotive
- Utilities
- Service Providers
- Any organization requiring cellular service for rural, underground or buildings with limited reception.

**Most problem areas with limited or no cellular reception are within 20 to 30 miles of an existing cell tower** that could provide a strong signal for voice, video and data on smart phones, tablets and other cellular devices. XPANDAc cell captures that distant cellular signal and fills the problem areas.

**XPANDAcell repeaters and extenders are utilized worldwide when quality, reliability and the most demanding environments require cellular reception.**

Whether an oil platform off the coast of Africa or a vacation resort in Montana, XPANDAcell has the experience and products to solve your cellular reception problems.

**XPANDA****cell**
